

# MicroComm DXI

IOC-110

Input/Output Card Cage

## Description

The I/O Card Cage is a 19" rack mounted card cage that provides power, network, and digital audio bus connections for the DXI control and I/O boards. It has the capacity for 1 control board and 16 I/O boards, or in the case of a redundant system, 2 control boards and 15 I/O boards. Up to 10 I/O card cages can be interconnected to form a system exchange. Larger systems can be configured with multiple exchanges interconnected via SAC Data Networks and Digital Audio Trunks.

## Features

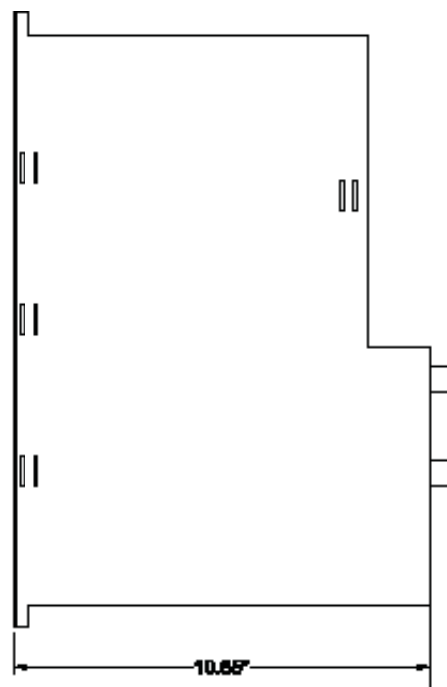

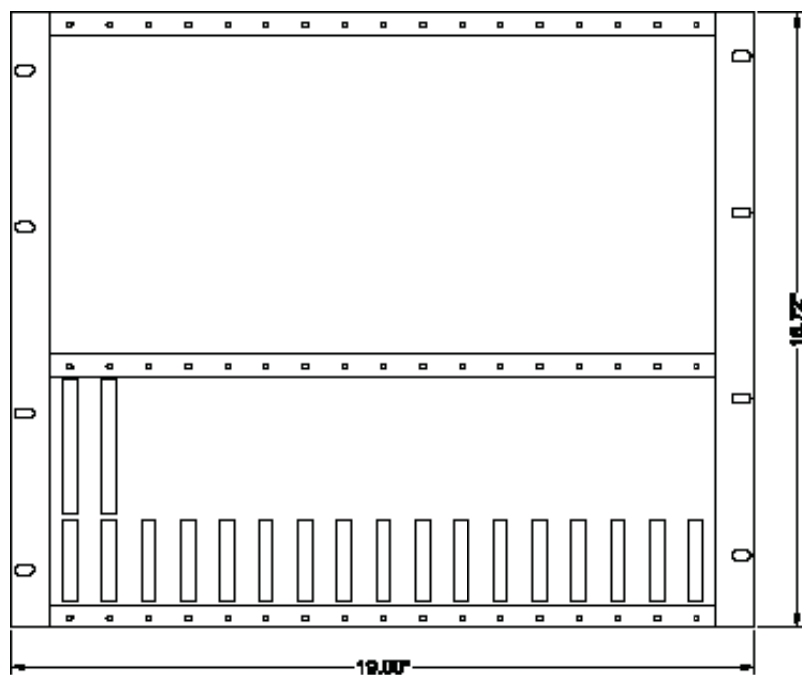

- all field connections on the rear of for quick and convenient installation and maintenance
- external reset and backup and control inputs are convenient tools for installation and maintenance
- fused power input connections to protect the I/O boards
- designed to meet EMI radiation emission and susceptibility standards
- redundant control card support
- redundant digital audio bus connections to each I/O card
- designed for card insertion and removal while the system is powered and operating (live) to expedite installation and maintenance
- cards are held firmly in place by screws
- blank covers provided for unused slots

## Specifications

|                       |  |
|-----------------------|--|
| Physical              | EIA-310 19" rack mount<br>9 U high, 12" deep<br>(483 x 400 x 305 mm)   |
| Environmental         |  |
| Operating Temperature | 32 to 122 °F (0 to 50 °C)  |
| Storage Temperature   | -40 to 158 °F (-40 to 70 °C)   |
| Humidity              | 0 to 95 % non-condensing   |
| Power Supply          | ±12 Vdc ± 10% @ 30 A max   |
| I/O Capacity          | 1 control card and 16 I/O cards or<br>2 control cards and 15 I/O cards |
| Field Connections     |  |
| Power                 | Terminal Block   |
| Network               | Terminal Block   |
| Control               | Terminal Block   |
| Standards             | FCC Part 15, UL, CSA   |
